

Subject: One Essential Experience To Add Into Your Daily Routine...

Hi [First Name], can you imagine something for a moment...?

You wake up, roll out of bed and make your way to the bathroom. Looking in the mirror you notice your clear and fresh complexion, free from any acne, scars or blemishes.

You wash and dry your face as usual, applying a drop or two of essential oil to your regular cleansing routine and then...

You're ready to face the day ahead. And you've never felt more relaxed, calm and confident.

As you head out of the door, you get in your car and drive to your job feeling chilled and prepared for whatever work is ready to throw at you.

Come mid-morning your colleagues are wondering what has happened to you. They have never seen you so focused, smooth and serene. You can hear them whispering over the water cooler, wondering what it is you are doing differently...

Yes, **you**.

The person who is usually feeling stressed out; overworked and overwhelmed by your demanding lifestyle. So much that its even beginning to affect the health of your skin, along with your general wellbeing.

After lunch one of your colleagues asks you what your new secret is.

You smile, gently pulling out the small bottle of pure English Lavender essential oil from your bag.

'Essential Oils?' they ask, in amusement.

Essential oils may be really popular right now, but not many truly understand the *essential oil experience*. Or how powerful it can be to enhancing every area of your health and wellness.

No, it's not an exaggeration. Not only can essential oils be a natural healer, they can help you to feel and look your best on the inside and outside...

Especially Lavender Oil. This potent essential oil has been used since Ancient times and is renowned for its healing benefits.

How does it do this?

Let me explain. Lavender oil helps to balance sebum production, improving your complexion. A drop or two of lavender oil with your all-natural cleanser or moisturiser can even help to clear acne and even reduce scars.

As an anti-bacterial herb, lavender oil is ideal for cleaning, preventing infections and helping wounds to heal faster. Adding a drop of lavender oil to your cleaning products can also make a big difference to their effectiveness.

Struggling to relax? Lavender oil can lull you into a good night's sleep. Simply roll it onto your temples, forehead and wrists, inhaling deeply for a few moments.

Want to find a moment of calm in your stressful day?

By rubbing or spraying lavender oil onto the temples, forehead and the back of jaw, it's possible to calm your nerves and anxiety. This makes lavender oil ideal for relieving stress if you are going through challenging times.
